Due Diligence

When it comes to buying a property, due diligence is essential. We handle the legal investigation of the property, which involves requesting and analyzing key documentation to protect your investment. Additionally, we verify the legal status of the property with the Public Records Office and validate the accuracy of the documentation provided by the seller. With our experience, we help you identify any potential investment risks.

Preparation and Review of Promissory Contracts

At WSR Compliance, we understand the importance of reviewing contracts. That is why we offer our services for the preparation and review of promissory contracts. We carefully examine the legality of the contract, focusing on its clauses and obligations that may affect you. Our goal is to provide a clear view of the terms, identify any potential risks, and negotiate clauses that are appropriate to your needs.

Restricted Zone Trust

If your client is looking to acquire a property in Mexico to live in or rent out as a vacation property, the restricted zone trust is a strategic option. The trust is a safe way to acquire rights to a property, allowing for enjoyment, rental, inheritance, profit, and even the sale of rights as if you were the owner. At WSR Compliance, we specialize in helping you evaluate whether this type of trust fits your client's goals.

Development and Construction Trust

This trust is focused on investors interested in construction and real estate development, as it facilitates all the necessary procedures for the successful completion of the project. One of its benefits is that it can be formed by different individuals or entities, who can contribute the property, construction, marketing, among others. This trust is a legal, secure, effective, and transparent mechanism. At WSR Compliance, we create personalized strategies to establish the legal structure of the project.

Real Estate Services

Real Estate Closings

At WSR Compliance, we manage the deed for any type of real estate transaction, such as sales, trusts, assignment of trustee rights, trust termination, and property transfers. This process begins with collecting client data, creating their files, and preparing the necessary documentation for tax compliance. Finally, we coordinate all the necessary steps for signing the deed before a notary.

Property Regularization

We know that the state of the north of the country offers excellent real estate options. However, some properties face challenges in reaching their maximum value. A prime example is properties with constructions that need to be regularized before being put on the market. At WSR Compliance, we help you design strategies to increase the value of the property you will be marketing.

We help create Mexican companies for foreign investors who wish to acquire properties for business purposes. A company can be formed entirely by foreign partners, as none of them is required to be Mexican. It is important to note that the company's representative must be Mexican or a resident of Mexico. Our lawyers will carefully analyze your needs to find the most suitable option for you and will provide you with advice at every step of the process.
